

STELLA'S ROOM

Brow Aftercare

WHAT TO EXPECT

Day 1

After procedure. brows look BOLD, yet perfect.

Day 2-4

They become darker as soon as the next day.

Day 4-10

At this stage they start to scab and itch.

Day 10-15

"Ghosting Stage"
Your brows flake & almost disappear!

Day 15-30

The color is coming back. I am so excited for my touchup.

Touch up day

The "perfecting" session is done.

EYEBROW AFTERCARE INSTRUCTIONS

YOU SHOULD

Clean the brow area in a circular motion using the provided wipes this evening prior to bed and tomorrow morning & evening.

Keep the area dry for the first 7 days. While showering or washing hair apply thin layer of cream provided to protect

Apply a thin layer of the provided aftercare cream 2 times per day. Preferably morning and evening.

YOU SHOULDN'T

Use a washcloth on the treated area.

Pick or scratch the treated area.

Use a sauna, swim, or expose to steam for 10 days.

Apply makeup to the treated area for 10 days.

Perform any heavy exercise for 1 week.
Avoid sweat on the treated area.

After the initial procedure your brows will appear almost perfect, but this will change. Please be aware of the healing stages to avoid stressing about your brows. Your brows will go through several stages where they will become darker, then will become scabbed and itchy, and finally will almost disappear (ghosting stage), before finally healing to between 50% and 70% of their original depth.

Once you have gone through a full cycle of skin regeneration (6-8 weeks) You will then be able to see what may need adjusted. It is necessary to schedule a perfecting session (touch-up) to complete the process.
